Profile

Junior front-end developer with experience building custom, reliable and high performing websites that meets clients' needs. Completed BCIT's Technical Web Design program after obtaining a bachelor's degree in economics from SFU. Strong critical thinking skills with customer service experience. Fluent in English and Mandarin.

Technical Projects

Roberta McDonald

A professional writer that specializes in building connections by providing a large variety of writing services since 2002. Worked in collaboration with 2 team members to create a custom WordPress website.

- Organized and conducted multiple meetings to gather client need's and requirements
- Created information architecture, style tiles, wireframes, and mockups after getting approval from client
- Customized the WordPress dashboard by removing menu items, adding tutorials, and customizing the login screen to create a user-friendly interface
- Increased productivity and saving unnecessary hours of writing repetitive code by creating multiple SASS mixins and variables

BCIT Class Projects

Used industry relevant technologies to complete daily programming assignments and projects

- Utilized HTML5 semantic tags to improve accessibility and indexability
- Added interactivity with CSS3 to create not only visually appealing but also accessible, usable and standards compliant websites
- Developed with a mobile first approach by using grids, flexboxes, and CSS3 media queries to ensure that the website renders well on different devices and screen sizes
- Modified the WordPress CMS by creating new themes and functions for easier content management

Work Experience

Shoppers Drug Mart

Aug 2017 - Jan 2018

- Processed customer's purchase and accurately account for cash, coupon, and credit transactions
- Consistently ranked among top 3 for getting the most Optimum Card sign ups per week
- Raised over \$300 for a local women's health charity at Shoppers Drug Mart and was ranked number 1 in store
- Recognized by supervisor for using bilingual skill to resolve conflict between customer and colleague
